

# Assignment Addon

-

Add the assignment feature for your students with the Academy Assignment addon. You can provide assignments to your students to make the course more effective.

You have to install the assignment addon to enhance this feature. Follow the steps to install the addon on your application.

- Before installing the process, we highly recommend you check your application version. For this, you have to navigate to the "**About**" section from the "**Settings**" button.

**Figure 1.** Academy LMS Checking Application Version

- If you are running the mentioned version, then you are ready to install this addon.
- Download the addon you want to install on your application from Codecanyon.
- Unzip the downloaded file.
- You should get Two folders inside. One for documentation and the other for the addon file.
- Do not try to remove or rename any folder.
- Go back to the application and log in as an admin.
- Select the "**Addon**" option from the left menu.
- Click on the "**Install addon.**"

Install addon Buy new addon

**Figure 2.** Academy LMS Adding New Addon

- Provide the purchase code.
- Upload the zip file from your device.
- Click on the "**Install addon**" button.
- You will get a success message notification.

## Admin & Instructor:

Your instructors can also publish assignments based on their courses (If you allow public instructors on your application). The site admin and instructors can create, publish, update, delete, review, provide marks and comments, mark as draft their assignments course-wise. For this, you can follow the steps below:

- Log in to the admin panel.
- Select the "**Course**" menu from the left menu.
- Choose the "**Manage course**" button from the sub-menu.
- Select a course.
- Click on the "**Action**" icon of the course.

**Your questions:**

Please read the questions carefully.

1. What is Adobe Illustrator and why it is used?
2. What is the difference between Photoshop and Illustrator?
3. What do I need for Adobe Illustrator?
4. Do you need a graphics card for Illustrator?

**Download question file:**

(2 - 1) Assignment 2.pdf

**Student's submission:**

Submitted by: Signe Thompson

**Answers:**

1. Adobe Illustrator is the industry-standard design app that lets you capture your creative vision with shapes, color, effects, and typography. Work across desktop and mobile devices and quickly create beautiful designs that can go anywhere—print, web and apps, video and animations, and more.
2. The main difference between Photoshop & Illustrator is the kind of graphics each application creates, Photoshop creates raster graphics using pixels, while Illustrator creates vectors. What is Illustrator: Adobe Illustrator is advanced, vector-based editing software.
3. Intel Pentium 4 or AMD Athlon 64 processor. Microsoft Windows 7 with Service Pack 1, Windows 8, Windows 8.1, or Windows 10. 1 GB of RAM (3 GB recommended) for 32 bit; 2 GB of RAM (8 GB recommended) for 64 bit.
4. You need a graphics card to run your OS and use Adobe Illustrator. Could be a Discrete Graphics card, or could be embedded in the CPU, but needs a Graphics card at all times.

**Your questions:**

**QUESTIONS:**

Please read the questions carefully.

1. What is web design definition?
2. What does a web designer do?
3. How can I create a website?
4. What is a web design in HTML?

**Download question file:**

**Student's submission:**

Submitted by: Signe Thompson

**Answers:**

1.ans: Web design refers to **the design of websites that are displayed on the internet**. It usually refers to the user experience aspects of website development rather than software development.

2.ans:

A Web Designer, or Web Applications Designer, is responsible for designing the overall layout and aesthetic for websites. Their duties include **coding webpages or entire websites, meeting with clients to review website templates or refine their designs and running tests to preview layouts and website features.**

3. ans: Most customers will expect to be able to find your business on the internet. Whether you are selling your products online, or simply want to provide some information about your business and your contact details, having a website is almost essential.

4.ans: Web design refers to **the design of websites that are displayed on the internet**. It usually refers to the user experience aspects of website development rather than software development.
