Ebook-theme Installation:

Please follow the below steps to complete the installation process for the ebook frontend view according to your active theme.

1. Before installing the Ebook addon, we will recommend you to move the view files first(Only if you have a theme installed).
2. This process is manual.
3. View files for Ebook addon have been placed separately inside the Ebook-theme folder.
4. Here you will find all the view files we've used for all the different themes like Nifty, Elegant & Firdaus.
5. You will have to move the view files manually on your server.
6. Just follow the steps below.

- Theme folder location: Root directory of your server > application > views > frontend > put the theme files of your ebook here inside your installed theme folder.

- Please see the **screenshots below** to better understand the Process.
